DETAILED ACTION

This is an Allowance for application no. 10/037,845 in response to the amendment filed March 21, 2005 in which claims 1-12 and 14-17 are presented for examination.

Allowable Subject Matter

Claims 1-12 and 14-17 are allowed.

The following is an examiner's statement of reasons for allowance:

The claims pertain to a High-resolution sheet metal scanner using machine vision that the Examiner was unable to find in several prior art searches.

The closest prior art (Doering US Patent 5,184,217) discloses a similar sheet metal scanner. As shown in Figure 1, Doering teaches a sheet metal scanner using machine vision for checking the accuracy of openings drilled or punched into a mechanical part (Col 2 Lines 12-20, Fig. 1). The scanner contains a lower assembly, which includes a housing (12). Doering teaches the use of a carriage assembly (22) and can perform movement in two orthogonal directions in a horizontal plane (Col 4 Lines 24-45, Fig. 1). The scanner further includes a flat transparent support plate (Col 3 Lines 57-65, Fig. 1). A camera assembly (30) is mounted on said carriage (22). A linear illuminator mounted above said lower assembly and providing a substantially uniform light along a line in one of said orthogonal directions and being linearly movable in the other of said orthogonal directions across said support plate (26) (Col 4 Lines 1-3, Fig. 1). The scanner also includes a control means coupled with said carriage assembly and with said camera assembly for guiding said camera assembly in a controlled

scanning pattern within said lower assembly housing and processing image data of said part based on pixels produced by said camera assembly imager (150) (Col 6 Lines 54-67, Fig. 1). The illuminator control means for linearly moving said illuminator in the other of said orthogonal directions to track motion of said camera carriage member (Col 6 Line 54-Col 7 Line 32). However, Doering does not teach the scanner wherein said linear illuminator is mechanically independent of said camera carriage assembly. This feature taken with the others in the claims define over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erick Rekstad whose telephone number is 571-272-7338. The examiner can normally be reached on 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Kelley can be reached on 571-272-7331. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
